Your 3D Scans Processed by DDI

The Virtual Imaging Center

DDS and DDI Collaboration

Serving the dental community since 1995

DDS Imaging Center

Your virtual in-house Imaging Center

DDI can process your cone beam scans and patient records into a custom Digital Portfolio.

What is a Digital Portfolio?

A collection of key images that explain the chief concern and incidental findings. A portfolio is for patient consults and sharing with referrals,

Your Time is Valuable

Allow DDI's highly trained technologists to spend their time and expertise building the image sets, so you can focus on diagnosis and treatment planning.

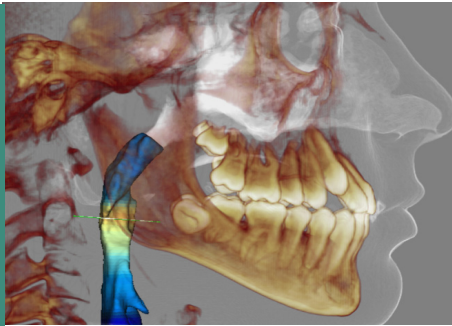

Radiologist Available

DDI can upload your patient's case to a maxillofacial radiologist for a report.

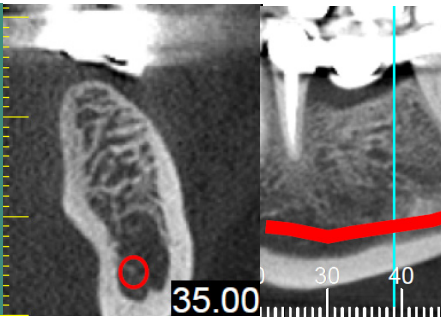

About DDI

Diagnostic Digital Imaging is the leader in 3-Dimensional Maxillofacial Imaging. We provide doctors with excellent diagnostic tools to assist them in understanding the 3D human anatomy and by providing a customized series of diagnostic records.
